Runtime
4 h
with i-power 9

Practical performance
up to 700 m²/h

Clean 300m²
in 1 minute
setup time

Why choose i-walk?

Faster

It takes less than 1 minute to put the i-walk to work which saves time for other tasks.

Cleaner

i-walk offers co-botization combined with the i-mop cleaning performance.

Greener

Uses 70% less water and chemicals compared to manual cleaning, thanks to its advanced recovery system.

Safer

super dry floor reduces slip accidents because of the advanced suction technology.

Better for everyone

Improves the lives of cleaners by doing the repetitive work.

Why i-walk is your choice:

Compatible with all i-mop XL models from 2014 onwards, allowing you to upgrade machines that you already have with modern robotics.

Less strain on cleaners bodies, since they don't have to clean large floor areas anymore.

No compromise on cleaning quality, due to the integration of an i-mop inside.

Minimizes consumables used due to its advanced recovery system, making it a sustainable choice for effective cleaning.

Unique co-bot functionality
Takes over repetitive tasks, freeing up the operator for more complex work.

- 1. Ultrasonic distance sensors**
- 2. Cliff detector sensors**
- 3. High quality LiDAR (50m range)**
- 4. TOF sensor**
- 5. High performance fraction wheels**
- 6. Side guard bumper wheels**
- 7. Safety bumper with auto stop**
